#### **MD MASTAN**

## **DevOps Engineer**

#### **PROFESSIONAL SUMMARY**

Dedicated and enthusiastic DevOps Engineer with 1.5 years of hands-on experience in Linux system administration and current DevOps practices. Skilled in cloud infrastructure (AWS), CI/CD pipelines, containerization, infrastructure as code (IaC), and automation. Adept at delivering secure, scalable, and highly available solutions in cloud-native environments. Strong foundational experience in education, now fully transitioned into IT.

#### **TECHNICAL SKILLS**

- Cloud & Infrastructure: AWS (EC2, S3, IAM, VPC, RDS, CloudWatch, Lambda)
- Operating Systems & Scripting: Linux (Ubuntu, CentOS), Windows Server, Bash, Python (basic)
- Infrastructure as Code: Terraform, CloudFormation
- Containers & Orchestration: Docker, Kubernetes
- CI/CD Tools: Jenkins, GitHub, SonarQube
- Version Control: Git, GitHub
- Networking: Subnetting, Routing, Switching, Security Groups, NACLs

### **CERTIFICATIONS**

- AWS Certified Solutions Architect Associate
- DevOps Certification
- Linux System Administration
- Microsoft Certified Solutions Associate (MCSA Windows Server)
- Cisco Certified Network Associate (CCNA)

#### **PROJECT HIGHLIGHTS**

## CI/CD Pipeline Deployment for Web Application (AWS, Jenkins, Docker, Kubernetes)

- Built a CI/CD pipeline using Jenkins, GitHub, Docker, and Kubernetes (EKS)
- Enabled automated build, test, and zero-downtime deployment
- Integrated SonarQube for static code analysis and security scans
- Implemented rollback strategies and blue-green deployments

# 3-Tier Web Application Deployment on AWS

- Architected VPC-based 3-tier setup with EC2, ALB, and RDS across multiple AZs
- Automated infrastructure provisioning using Terraform
- Configured Auto Scaling, IAM roles, security policies for resilience and security

# **WordPress Deployment with LAMP Stack Using Vagrant**

- Deployed WordPress on a virtualized LAMP environment
- Automated provisioning and setup using shell scripts

### PROFESSIONAL EXPERIENCE

## **DevOps Engineer Intern**

IIHT, Jayanagar, Bangalore Jan 2025 – Present

- Set up CI/CD pipelines and containerized applications
- Managed AWS services and integrated GitHub with Jenkins
- Monitored infrastructure with CloudWatch

## **Linux System Administrator**

Techpragna E-Learning Pvt. Ltd, Bangalore
July 2023 – Jan 2025

- Managed Linux servers and handled system patching
- Implemented user/group automation and backup scheduling
- Configured firewalls and performed log analysis

# **Senior Lecturer**

HKDET's Polytechnic, Humnabad Dec 2009 – Mar 2020

- Delivered courses in computer science/IT subjects
- Led online teaching initiatives and curriculum development

## **EDUCATION**

# **Bachelor of Engineering (BE)**

PDA College of Engineering, Gulbarga – VTU, Karnataka Graduated: 2009

Place: Bangalore

Date: MD MASTAN
